

materimaging MRI

catering for your comfort

materimaging is committed to your comfort whilst providing high quality imaging

At **materimaging**, we are dedicated to ensuring your MRI scan is not only of the highest quality but that your comfort is always our priority. That is why our staff are extensively trained on patient care within the MRI environment and we provide headphones so you can listen to your favourite radio station or bring along a CD of your own music which we will happily play during your scan.

MRI stands for Magnetic Resonance Imaging and uses a very strong magnetic field and radio waves to produce images of the body without the use of radiation.

Our MRI scanner includes a comprehensive suite of high resolution dedicated multi-channel coils for each region of the body. We perform a wide range of MRI scans including musculoskeletal, head, spine and breast MR.

Important: It is important for you to let us know if you have ever had any metal injuries to your ear if you have one of the following: Cardiac pacemaker or defibrillator, Cochlear Implants, Metal clips, Arteries any implanted devices.

Your health is our priority
